

A Life on our Planet

While watching the movie, answer the following questions. They are not (always) in chronological order and for some questions you will receive additional information throughout the movie.

1. Which event does the documentary start with?
2. What is understood by a life-support machine and how does it work?
3. Who is David Attenborough and what are some things he has experienced throughout his life?
4. What is said about extinction throughout global development?
5. Describe the biodiversity of the Holocene.
6. How was farming invented and why did it work?
7. Describe the tribal lifestyle which is portrayed and contrasted with the Western way of life.
8. Who is responsible for the global extinction?
9. Where is our exploitative lifestyle headed? Name some examples of the outcomes.
10. What is the definition of *unsustainable* and where does it lead to?
11. What is an indicator of the earth losing its balance? What role does the ocean play for our ecosystem?

12. Name some of the consequences the way we treat our earth (humanity's impact) has brought about.
13. What is the fate of the stability of our Holocene?
14. How can we restore the stability of our planet and find a way out of this crisis? Name the pieces of advice that are given.
15. Explain the importance of preserving our ocean as well as its living creatures and outline a way to save it in order to combat climate change.
16. Describe how a (largely) plant-based diet could heal and preserve the earth.
17. Explain the importance of forests for our environment.
18. Interpret the quote: *Nature is our biggest ally and our greatest inspiration.*
19. Interpret the quote: *We must learn to be a part of our nature instead of growing apart from our nature.*
20. How did nature overcome the mistakes mankind made with Chernobyl?
21. What is needed to be in balance with nature, apart from intelligence?
22. The bottom line of the documentary is:
